

## *International Student-Athlete Review*

---

TCG has developed a network of contacts to assist an institution in obtaining information about prospective and enrolled student-athletes from various countries. This assistance includes contacting appropriate individuals to obtain more information, conducting interviews, determining the professional status of the country's team, developing an institutional position, and requesting restoration, if necessary. Although the NCAA Eligibility Center conducts a review, the institution ultimately has responsibility to ensure that its athletes have no amateurism issues. TCG can assist in ensuring this responsibility.
