

Investigations

TCG staff and alliances have extensive investigative experience. Prior to undertaking interviews, TCG will consult with the institution to determine the investigative strategy and the policies and procedures to follow. TCG can conduct all or a portion of the institution's investigative interviews. In the alternative, TCG can supplement the investigative activities of the institution's legal counsel or compliance staff. TCG will work closely with the institution in order to limit its monetary exposure when hiring outside assistance.

While the vast majority of TCG's investigative efforts on behalf of its clients have involved NCAA legislation, TCG has done extensive work with two-year and interscholastic institutions, conferences, and associations.
